

Accelerating Non-Dilutive Capital Capture for Clean Energy Consultancies

Executive Overview: The Energy Innovation Terminal by AixEnergy (terminal.aixenergy.io) is the definitive intelligence platform built specifically for clean energy grant writing firms, technical consultancies, and hardtech project developers. It eliminates 90% of manual FOA review and consortium research overhead by providing automated 4-part proposal blueprints, 50,000+ past awardee ledgers, and comprehensive multi-agency capital stack modeling.

Core 9-Module Capabilities Architecture

MODULE & ENGINE	PLATFORM CAPABILITY & SCOPE	DIRECT CONSULTANCY VALUE
1. AI FOA Shredder	Shreds 80-page federal FOAs (DOE, CEC, ARPA-E, EPA) into structured 4-part blueprints in 10s.	Cuts 3 days of compliance research to 10 mins.
2. Teaming & Consortia	Indexes 50,000+ past recipients across DOE, NSF, USDA, and state programs with past scores.	Identifies proven co-applicants & prime subs.
3. 5-Stage Capital Stack	Models non-dilutive grant match against private venture capital and IRA tax credits.	Solves required 20–50% client cost-share.
4. Release Forecasting	Predictive radar forecasting upcoming solicitations 60–90 days before public release.	Gives clients 3-month head start on proposal prep.
5. DOE Testbed Directory	Catalogs 15+ national lab user facilities, CRADA mechanisms, and testing testbeds.	Coordinates hardware validation & pilot sites.
6. Policy & PUC Dockets	Tracks FERC, CPUC, NY PSC dockets, interconnect rules (IEEE 1547), and standards.	Ensures regulatory readiness & utility hosting.
7. University IP Portal	Indexes Bayh-Dole federal inventions, patents, and university tech transfer spinouts.	Discovers licensable deep tech IP for clients.
8. IRA Direct Pay Calc	Calculates Section 48C, 45X, 45V, and 45Q tax credits with direct pay bonuses.	Quantifies transferable tax equity value.
9. Publication PDF Engine	Generates 1-click institutional ReportLab PDF dossiers and client-ready memos.	Immediate billable deliverable for client retainers.

Pricing, ROI Economics & License Terms

FLAT RATE PRICING MODEL
\$1,500 / seat / month (Flat Rate)
Annual Contract Value: \$18,000 / seat / year • Volume Packages for 5 and 10 seats available

BILLABLE ROI JUSTIFICATION
At standard consultancy billing rates (\$350–\$500/hr), saving just **3–4 hours of analyst time per month** covers the entire platform seat cost. Consultancies can bill generated Proposal Blueprints directly to client retainers at \$2,500–\$5,000 per FOA shred.
