

ENERGY INNOVATION TERMINAL BY AIXENERGY

EXECUTIVE BRIEF
terminal.aixenergy.io

Release 3.5

INSTITUTIONAL CLEAN ENERGY GRANT & CAPITAL INTELLIGENCE SUITE

The Modern Grant Advisory Imperative: Advising clean tech innovators on multi-million dollar federal and state funding rounds requires far more than generic keyword search. Proposal teams must navigate strict **statutory stage gates, Community Benefits Plans (CBP), cost-share matching covenants, Buy America clauses, and complex consortia teaming** across fragmented public databases.

Energy Innovation Terminal by AixEnergy (terminal.aixenergy.io) is the unified intelligence operating system engineered specifically for clean tech grant writers, technical consultancies, and government affairs practices. It indexes **50,000+ past awards, \$18.4B in live funding, 1,200+ SEC Form D filings, and 500+ national lab testing testbeds** into a single high-speed terminal.

CORE PLATFORM CAPABILITIES FOR GRANT & ENERGY CONSULTANCIES

Platform Capability Module	Technical Functionality & Data Scope	Consultancy Value Impact
1. AI FOA Shredder & Scoring Rubric Engine	Decomposes 80+ page federal FOAs into 4-part PDF blueprints (Scoring Rubric, Stage Gates, Volume Checklist, Red-Team Win Themes) in 10 seconds.	Cuts FOA breakdown from 3 days to 10 seconds; instantly client-ready.
2. 50,000+ Past Awardee & Teaming Network	Comprehensive multi-criteria search of past winning primes, university research labs, national labs, and utility co-applicants across DOE, NYSERDA, CEC, and NSF.	Assembles winning multi-institution proposal consortia in minutes.
3. 5-Stage Capital Stack Continuum	Unifies non-dilutive grants, SEC Form D offerings, Climate VC rounds, DOE LPO debt, and commercial Bayh-Dole patents into single-entity dossiers.	Eliminates 3–4 days of due diligence; tracks co-investor track records.
4. Predictive Solicitation Release Forecasting	Machine-learning forecasting of recurring agency FOA cycles, expected drop dates, and budget allocations before official public posting.	Enables consultancies to pitch and prep clients 3–6 months ahead.
5. DOE National Lab Testbed & User Facility Access	Directory of user facilities, specialized instruments, and proposal deadline cycles across NREL, LBNL, PNNL, ORNL, NETL, and ANL.	Quickly matches clients with required national lab validation testing.
6. Policy, Codes, Standards & Regulatory Dockets	Tracks state decarbonization mandates, building efficiency standards, FERC proceedings, and IRA Section 48C / 45X / 45V guidance.	Ensures proposals align with statutory policy targets and mandates.
7. University Licensable IP & Spinout Portal	Direct access to licensable clean tech patents, TRL levels, and university technology transfer contacts (MIT, Stanford, Cornell, UC Berkeley, etc.).	Identifies ready-to-commercialize IP for SBIR/STTR and ARPA-E bids.
8. IRA Direct Pay & Tax Credit Calculator	Financial modeling engine calculating 30–50% federal direct pay benefits, prevailing wage multipliers, and domestic content adders.	Models project finance stacks alongside non-dilutive grant awards.
9. Publication-Grade 1-Click PDF Report Exports	Native ReportLab vector PDF export engine generating institutional compliance blueprints and recipient dossiers ready for client delivery.	Directly billable client deliverables with zero formatting hassle.

HOW CONSULTANCIES INTEGRATE THE TERMINAL INTO DAILY WORKFLOWS

Stage 1: Client Technology Intake & TRL Matching	Input client technology keywords, current TRL (1–9), and entity type. The Terminal instantly filters active \$18.4B solicitations and predicts upcoming grant drops matching their exact profile.
Stage 2: 10-Second Automated FOA Shredding	Run the AI FOA Shredder to extract mandatory cost-share rules, Buy America clauses, scoring rubrics, and submission volumes. Export a publication-grade PDF blueprint for the client in seconds.
Stage 3: Consortia Teaming & Subcontractor Sourcing	Query the 50,000+ past awardee network to identify previous winners, national lab testing facilities, and academic partners to assemble an unbeatable proposal team.
Stage 4: Due Diligence & Multi-Stage Capital Modeling	Generate 5-Stage Capital Dossiers and IRA Direct Pay tax credit models to present a complete, bankable capital plan to agency reviewers and co-investors.

COMMERCIAL LICENSING PLANS & ROI ECONOMICS

Plan Tier	Target Customer	Features & Quotas Included	Pricing
Practitioner Seat	Independent Grant Writers & Boutique Consultants	1 Named Seat • Unlimited FOA Shredding • Full 50k+ Database • PDF Exports	\$500 / mo Billed annually (\$600/mo mo-to-mo)
Consultancy Team	Grant Consultancies & Government Affairs Practices	5 Team Seats • Consortia Teaming Radar • White-Label PDFs • Predictive Forecasting	\$2,000 / mo (\$400/seat/mo • High ROI)
Enterprise Practice	Global Energy Advisory (ICF, Guidehouse, Big 4)	15+ Seats • REST API Access • Custom Ingestion Feeds • Dedicated Support SLA	\$5,000+ / mo Custom Enterprise SLA

Consultancy ROI Economics: At an average consultancy billing rate of \$200–\$350/hour, saving **20 hours of manual FOA decomposition and teaming research per grant proposal** recovers **\$4,000 to \$7,000 in billable value on every single proposal submitted**. A 5-seat Team License (\$2,000/mo) pays for itself more than 3x over on the very first grant application of the month.
