

ENERGY INNOVATION TERMINAL BY AIXENERGY

EXECUTIVE BRIEF
terminal.aixenergy.io

Release 3.5

INSTITUTIONAL CLEAN ENERGY GRANT & CAPITAL INTELLIGENCE SUITE

The Modern Grant & Energy Advisory Imperative: Advising clean tech innovators on multi-million dollar federal and state funding rounds requires far more than generic keyword search. Proposal teams must navigate strict **statutory stage gates**, **Community Benefits Plans (CBP)**, **cost-share matching covenants**, **Buy America clauses**, and **complex consortia teaming** across fragmented public databases.

Energy Innovation Terminal by AixEnergy (terminal.aixenergy.io) is the unified intelligence operating system engineered specifically for clean tech grant writers, technical consultancies, VCs, and corporate strategists. It unifies **56,413 awards**, **\$104.16B in tracked capital**, **140+ federal & state authorities**, **5,757 solicitations**, and **10,250 grid projects** into a single Bloomberg-grade terminal.

CORE PLATFORM CAPABILITIES FOR GRANT & ENERGY CONSULTANCIES

Platform Capability Module	Technical Functionality & Data Scope	Consultancy Value Impact
1. AI FOA Shredder & Scoring Rubric Engine	Decomposes 80+ page federal FOAs into 4-part PDF blueprints (Scoring Rubric, Stage Gates, Volume Checklist, Red-Team Win Themes) in 10 seconds.	Cuts FOA breakdown from 3 days to 10 seconds; instantly client-ready.
2. 56,400+ Past Awardee & Teaming Network	Comprehensive multi-criteria search of past winning primes, university research labs, national labs, and utility co-applicants across DOE, NYSERDA, CEC, and NSF.	Assembles winning multi-institution proposal consortia in minutes.
3. Say-Yes Decision Maker & PM Matrix	Directory of program managers, grant evaluators, and agency points of contact across 140+ federal and state entities.	Identifies key agency decision-makers and evaluator priorities.
4. 5-Stage Capital Stack Continuum	Unifies non-dilutive grants, SEC Form D offerings, Climate VC rounds, DOE LPO debt, and commercial Bayh-Dole patents into single-entity dossiers.	Eliminates 3–4 days of due diligence; tracks co-investor track records.
5. Predictive Solicitation Release Forecasting	Machine-learning forecasting of recurring agency FOA cycles, expected drop dates, and budget allocations before official public posting.	Enables consultancies to pitch and prep clients 3–6 months ahead.
6. DOE National Lab Testbed & User Facilities	Directory of user facilities, specialized instruments, and proposal deadline cycles across NREL, LBNL, PNNL, ORNL, NETL, and ANL.	Quickly matches clients with required national lab validation testing.
7. Policy, Codes, Standards & PUC Dockets	Tracks state decarbonization mandates, building efficiency standards, FERC proceedings, and IRA Section 48C / 45X / 45V guidance.	Ensures proposals align with statutory policy targets and mandates.
8. IRA Direct Pay & Tax Credit Calculator	Financial modeling engine calculating 30–50% federal direct pay benefits, prevailing wage multipliers, and domestic content adders.	Models project finance stacks alongside non-dilutive grant awards.
9. Publication-Grade 1-Click Vector PDF Exports	Native ReportLab vector PDF export engine generating institutional compliance blueprints and recipient dossiers ready for client delivery.	Directly billable client deliverables with zero formatting hassle.

COMPETITIVE DIFFERENTIATION: WHY THE TERMINAL WINS

Dimension	Energy Innovation Terminal (AixEnergy)	PitchBook / Crunchbase	GovWin IQ / Deltek
Clean Energy Data	56,413 awards (\$104.16B) across 140+ federal & state agencies (NYSERDA, DOE, CEC, MassCEC)	Private equity only; completely blind to state & federal grants	Broad defense/IT procurement only; zero state clean energy coverage
Advisory Tooling	AI FOA Shredder, Match Engine, Precedent Graphs, IRA Calculator	Basic company lists & deal tables	Legacy contract tables with no AI proposal synthesis
Pricing	\$1,500 / seat / mo flat rate (\$15k/yr annual)	\$25,000 – \$35,000 / yr (multi-seat min.)	\$10,000 – \$22,000 / yr

COMMERCIAL PRICING ARCHITECTURE & ROI ECONOMICS

Plan Tier	Target Customer	Features & Quotas Included	Pricing
Practitioner Seat	Solo Grant Writers & Boutique Advisors	1 Named Seat • Unlimited FOA Shreds • 56k+ Database • Vector PDF Exports	\$1,500 / mo \$15,000/yr billed annually
Boutique Team	Grant Consultancies & Gov Affairs Practices	3 Team Seats • Consortia Teaming Radar • White-Label PDFs • Predictive Radar	\$4,500 / mo \$45,000/yr billed annually
Practice Group	Consulting Firms & Clean Tech Practice Groups	5–10 Seats • Team Collaboration • Central Billing • Priority Tech Support	\$7,500 / mo \$75,000/yr billed annually
Enterprise Practice	Global Energy Advisory (ICF, Guidehouse, Big 4)	15+ Seats • Direct REST API • Custom Ingestion Feeds • Dedicated Support SLA	Custom Invoice Volume Enterprise SLA

Consultancy ROI Economics: At average consultancy billing rates of \$200–\$400/hour, saving 20 hours of manual FOA decomposition and teaming research per grant proposal recovers \$4,000 to \$8,000 in billable value on every single proposal submitted. In addition, winning just 1 additional \$2M+ federal/state grant (with standard 3–7% success fees) generates \$60,000 to \$140,000 in revenue, delivering a 4x to 10x net annual return on the Terminal subscription.
